### HTML Introduction

HTML is the standard markup language for creating web pages.

What is HTML? HTML stands for Hyper Text Markup language HTML is the standard markup language for creating web pages.

HTML describes the structure of the web page HTML consist of a series of elements HTML elements tell the browser how to display the content HTML elements label pieces of content such as "this is a heading", "this is a paragraph", "this is a link", etc.

Example Explained The "<!DOCTYPE html>" declaration defines that this document is an HTML5 document

The "html" element is the root element of of an HTML page

The "head" element contains meta information about the HTML page

The "title" element specifies a title for the html page (which is shown in the browser's title bar or in the page's tab)

The "body" element defines the document's body, and is a container for all the visible contents, such as headings, paragraphs, images, hyperlinks, tables, lists, etc.

The "h1" element defines a large heading

The "p" element defines a paragraph

What is an HTML Element? An HTML element is defined by a start tag, some content, and an end tag:
